☒ I acknowledge that this is a demo application that may be discontinued at any time. It is intended solely for testing and demonstration purposes and must not be used in a production environment. Applivity assumes no responsibility for data security or loss arising from the use of this demo.

[Register Your Account](#)

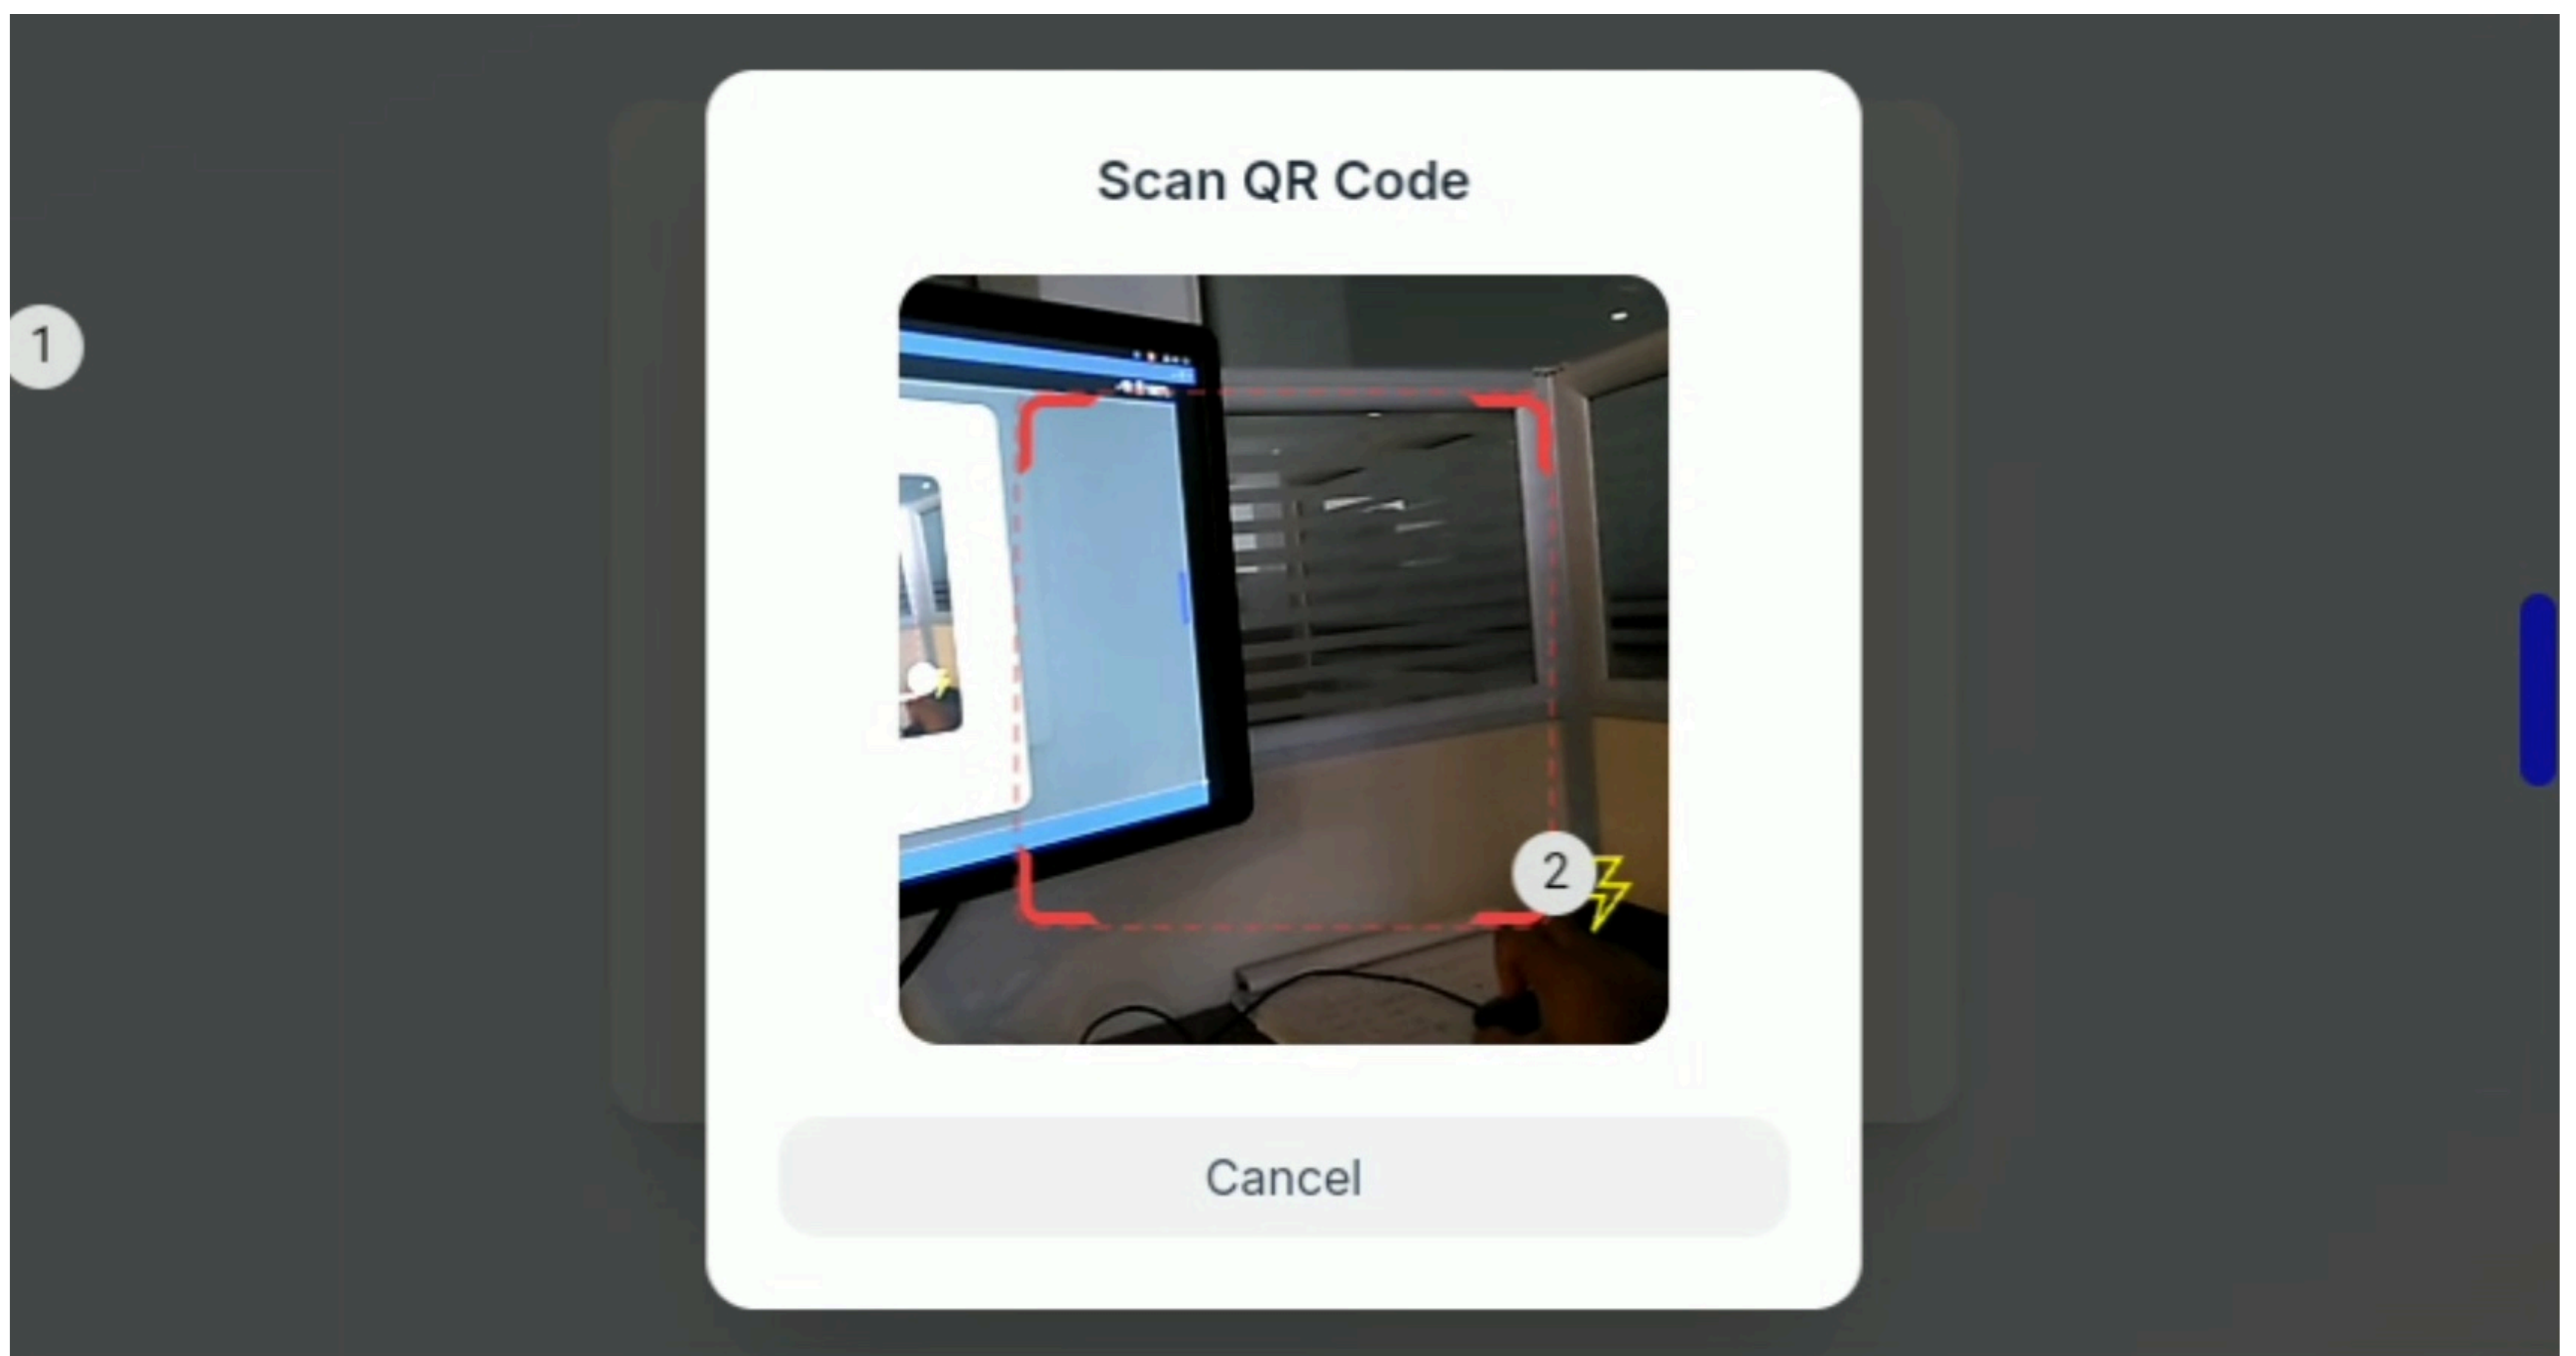

- Go to <https://videoanalysisai.applivity.com/register>.
- Enter your Full name, Company name, and work email to sign up.
- You must use your Company Email address to register for access.

Sign In with QR Code

Once registered, you will use a QR code to log into your RealWear device quickly without typing.

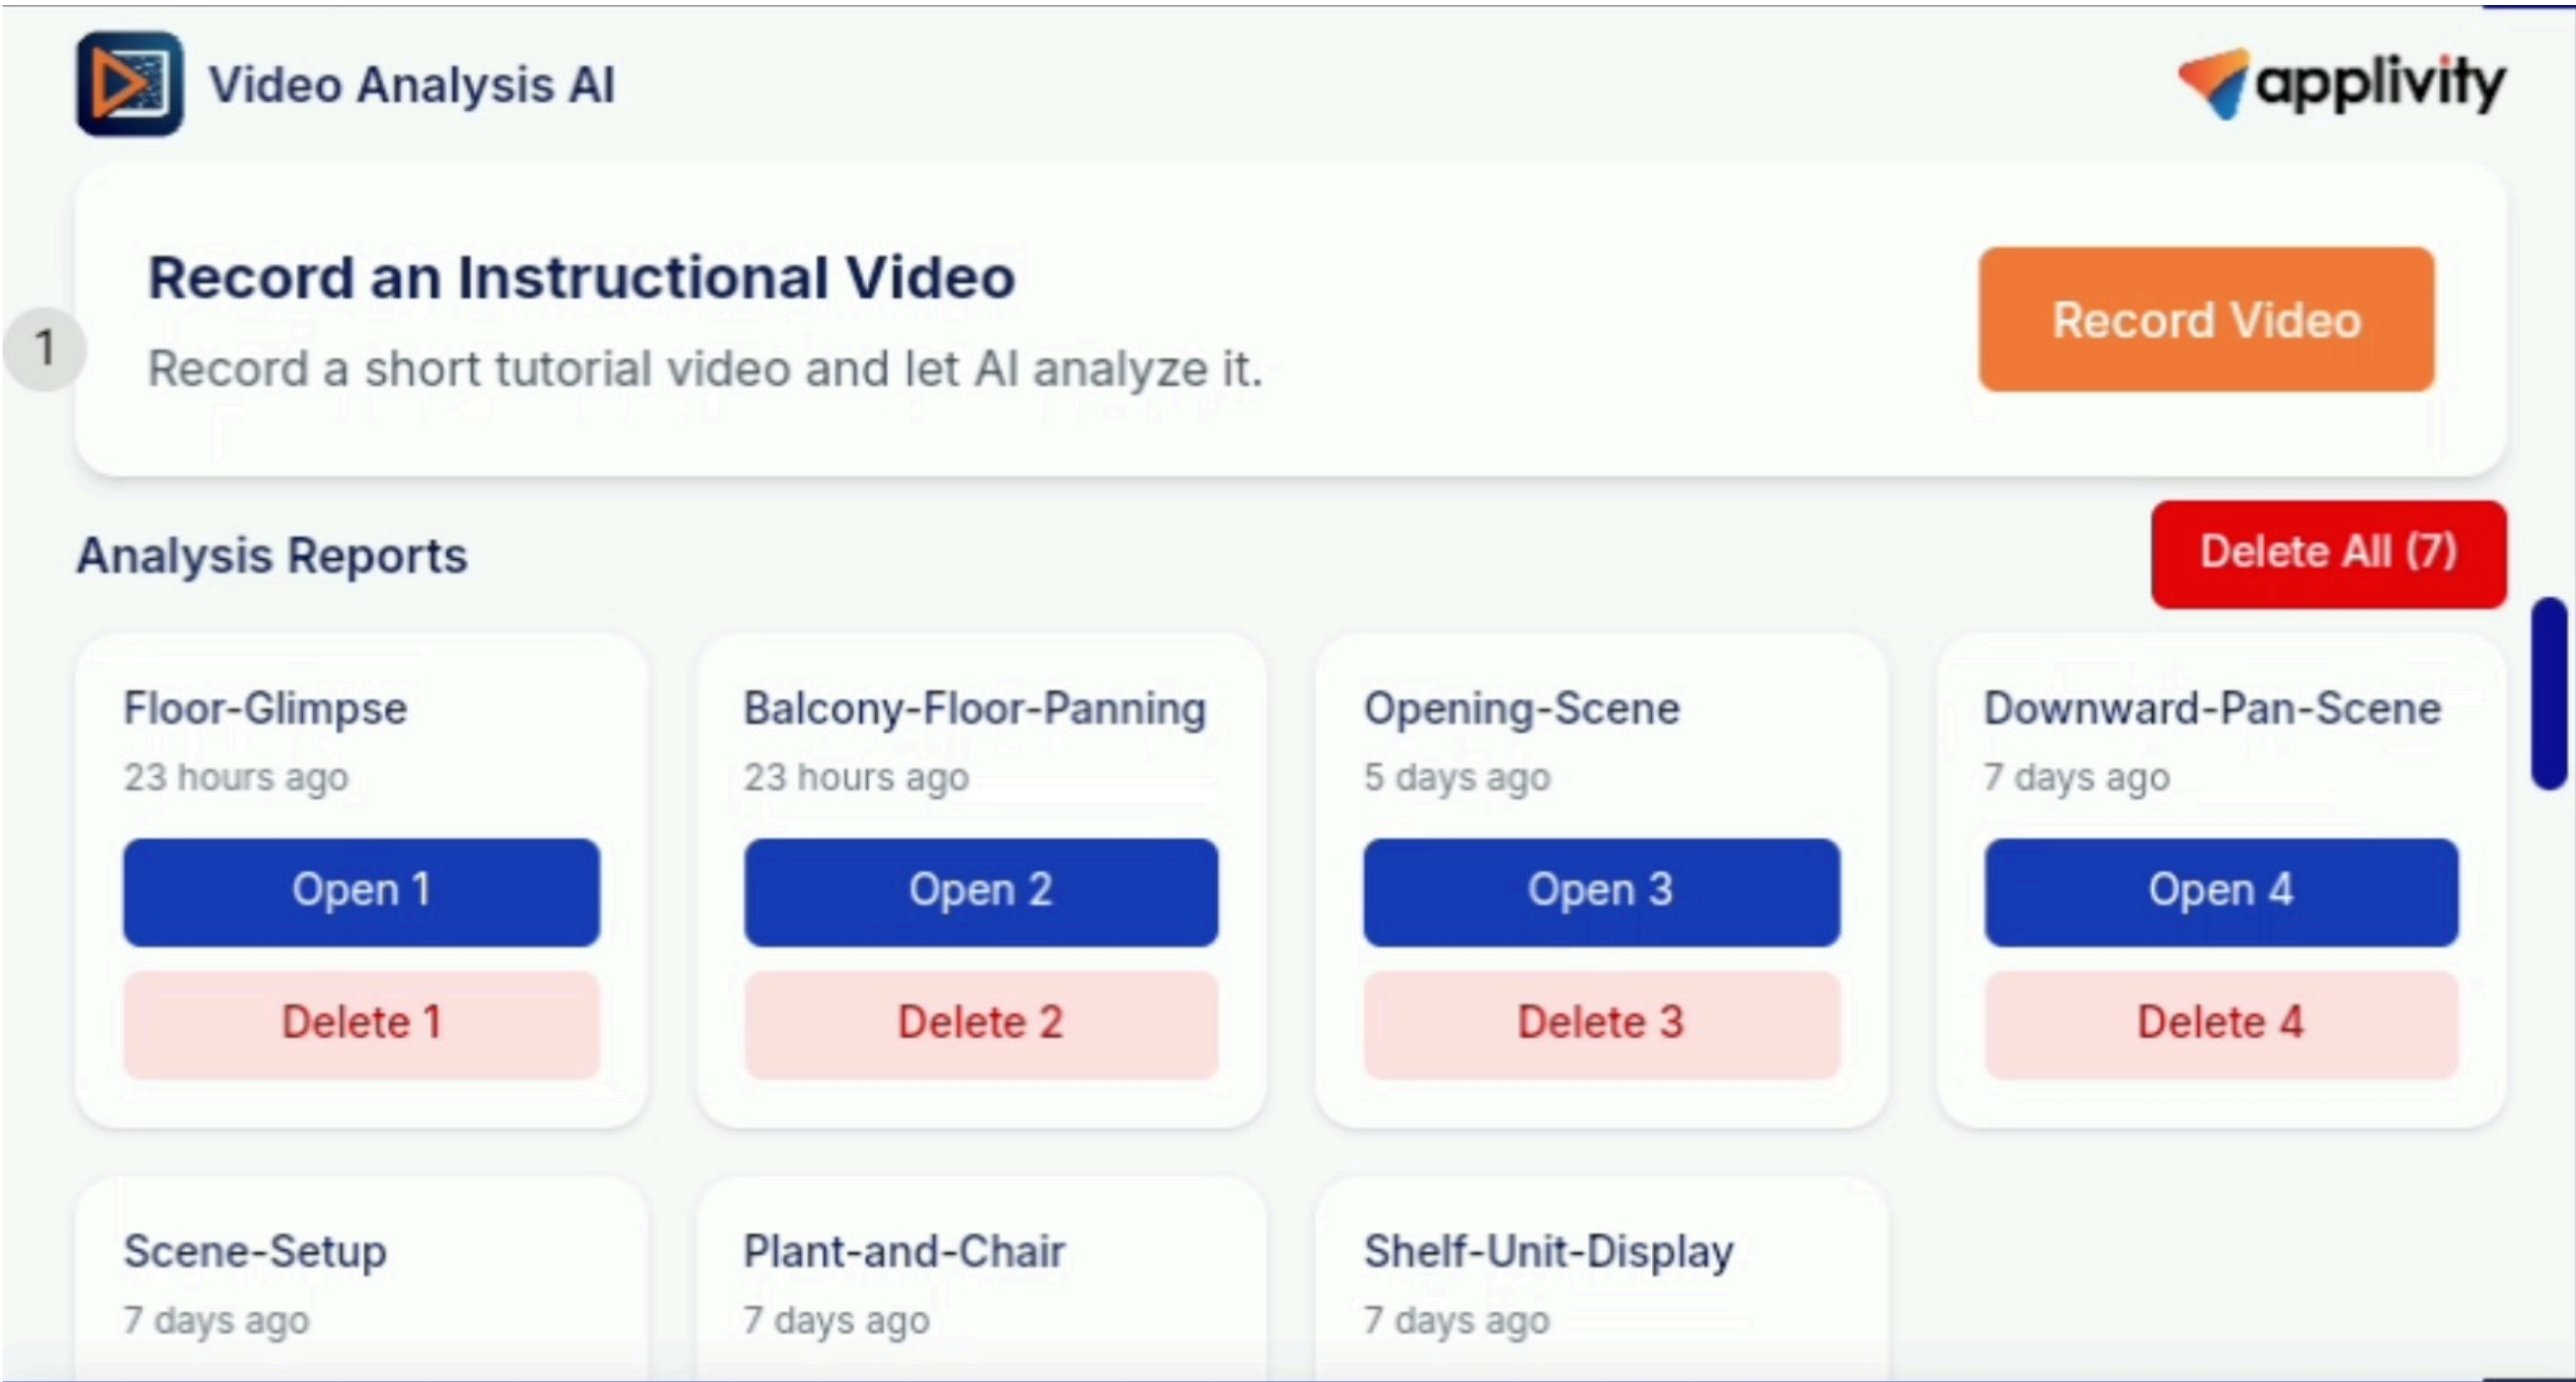

- Launch the app on your RealWear device and select the Open Scanner button.
- Point the device camera at the QR code received during registration to automatically log in.

App Dashboard Overview

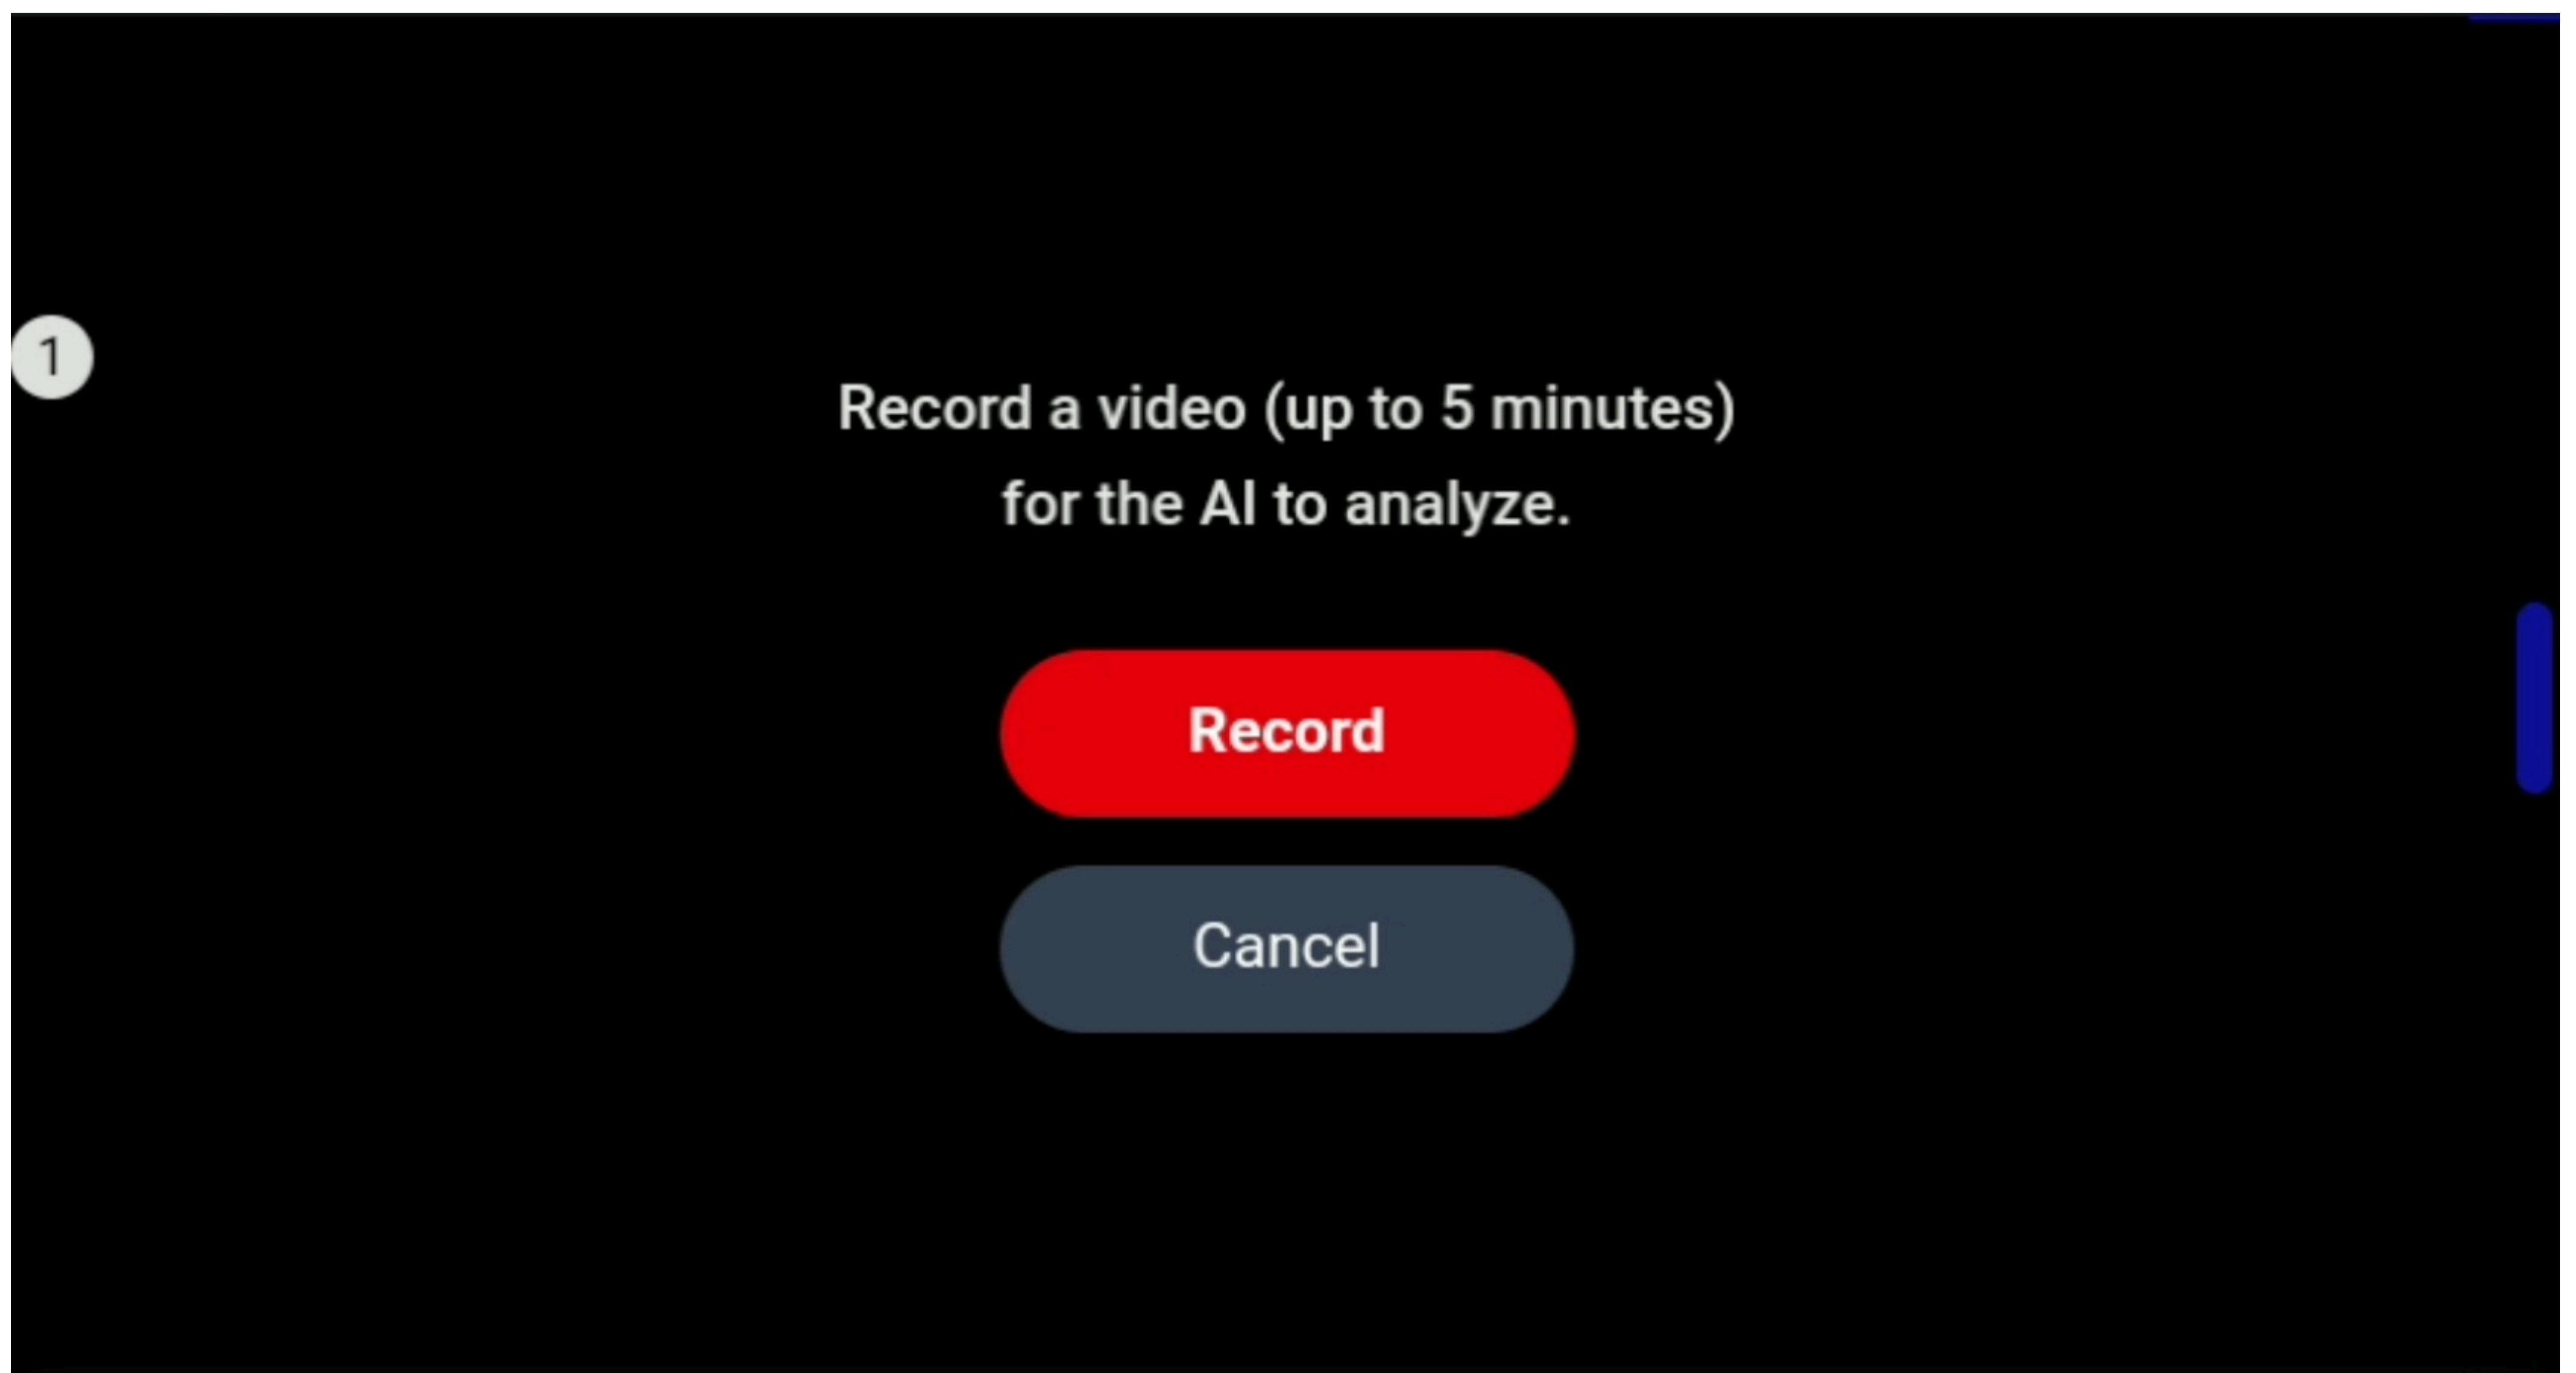

The dashboard is your central hub for managing video data and accessing results.

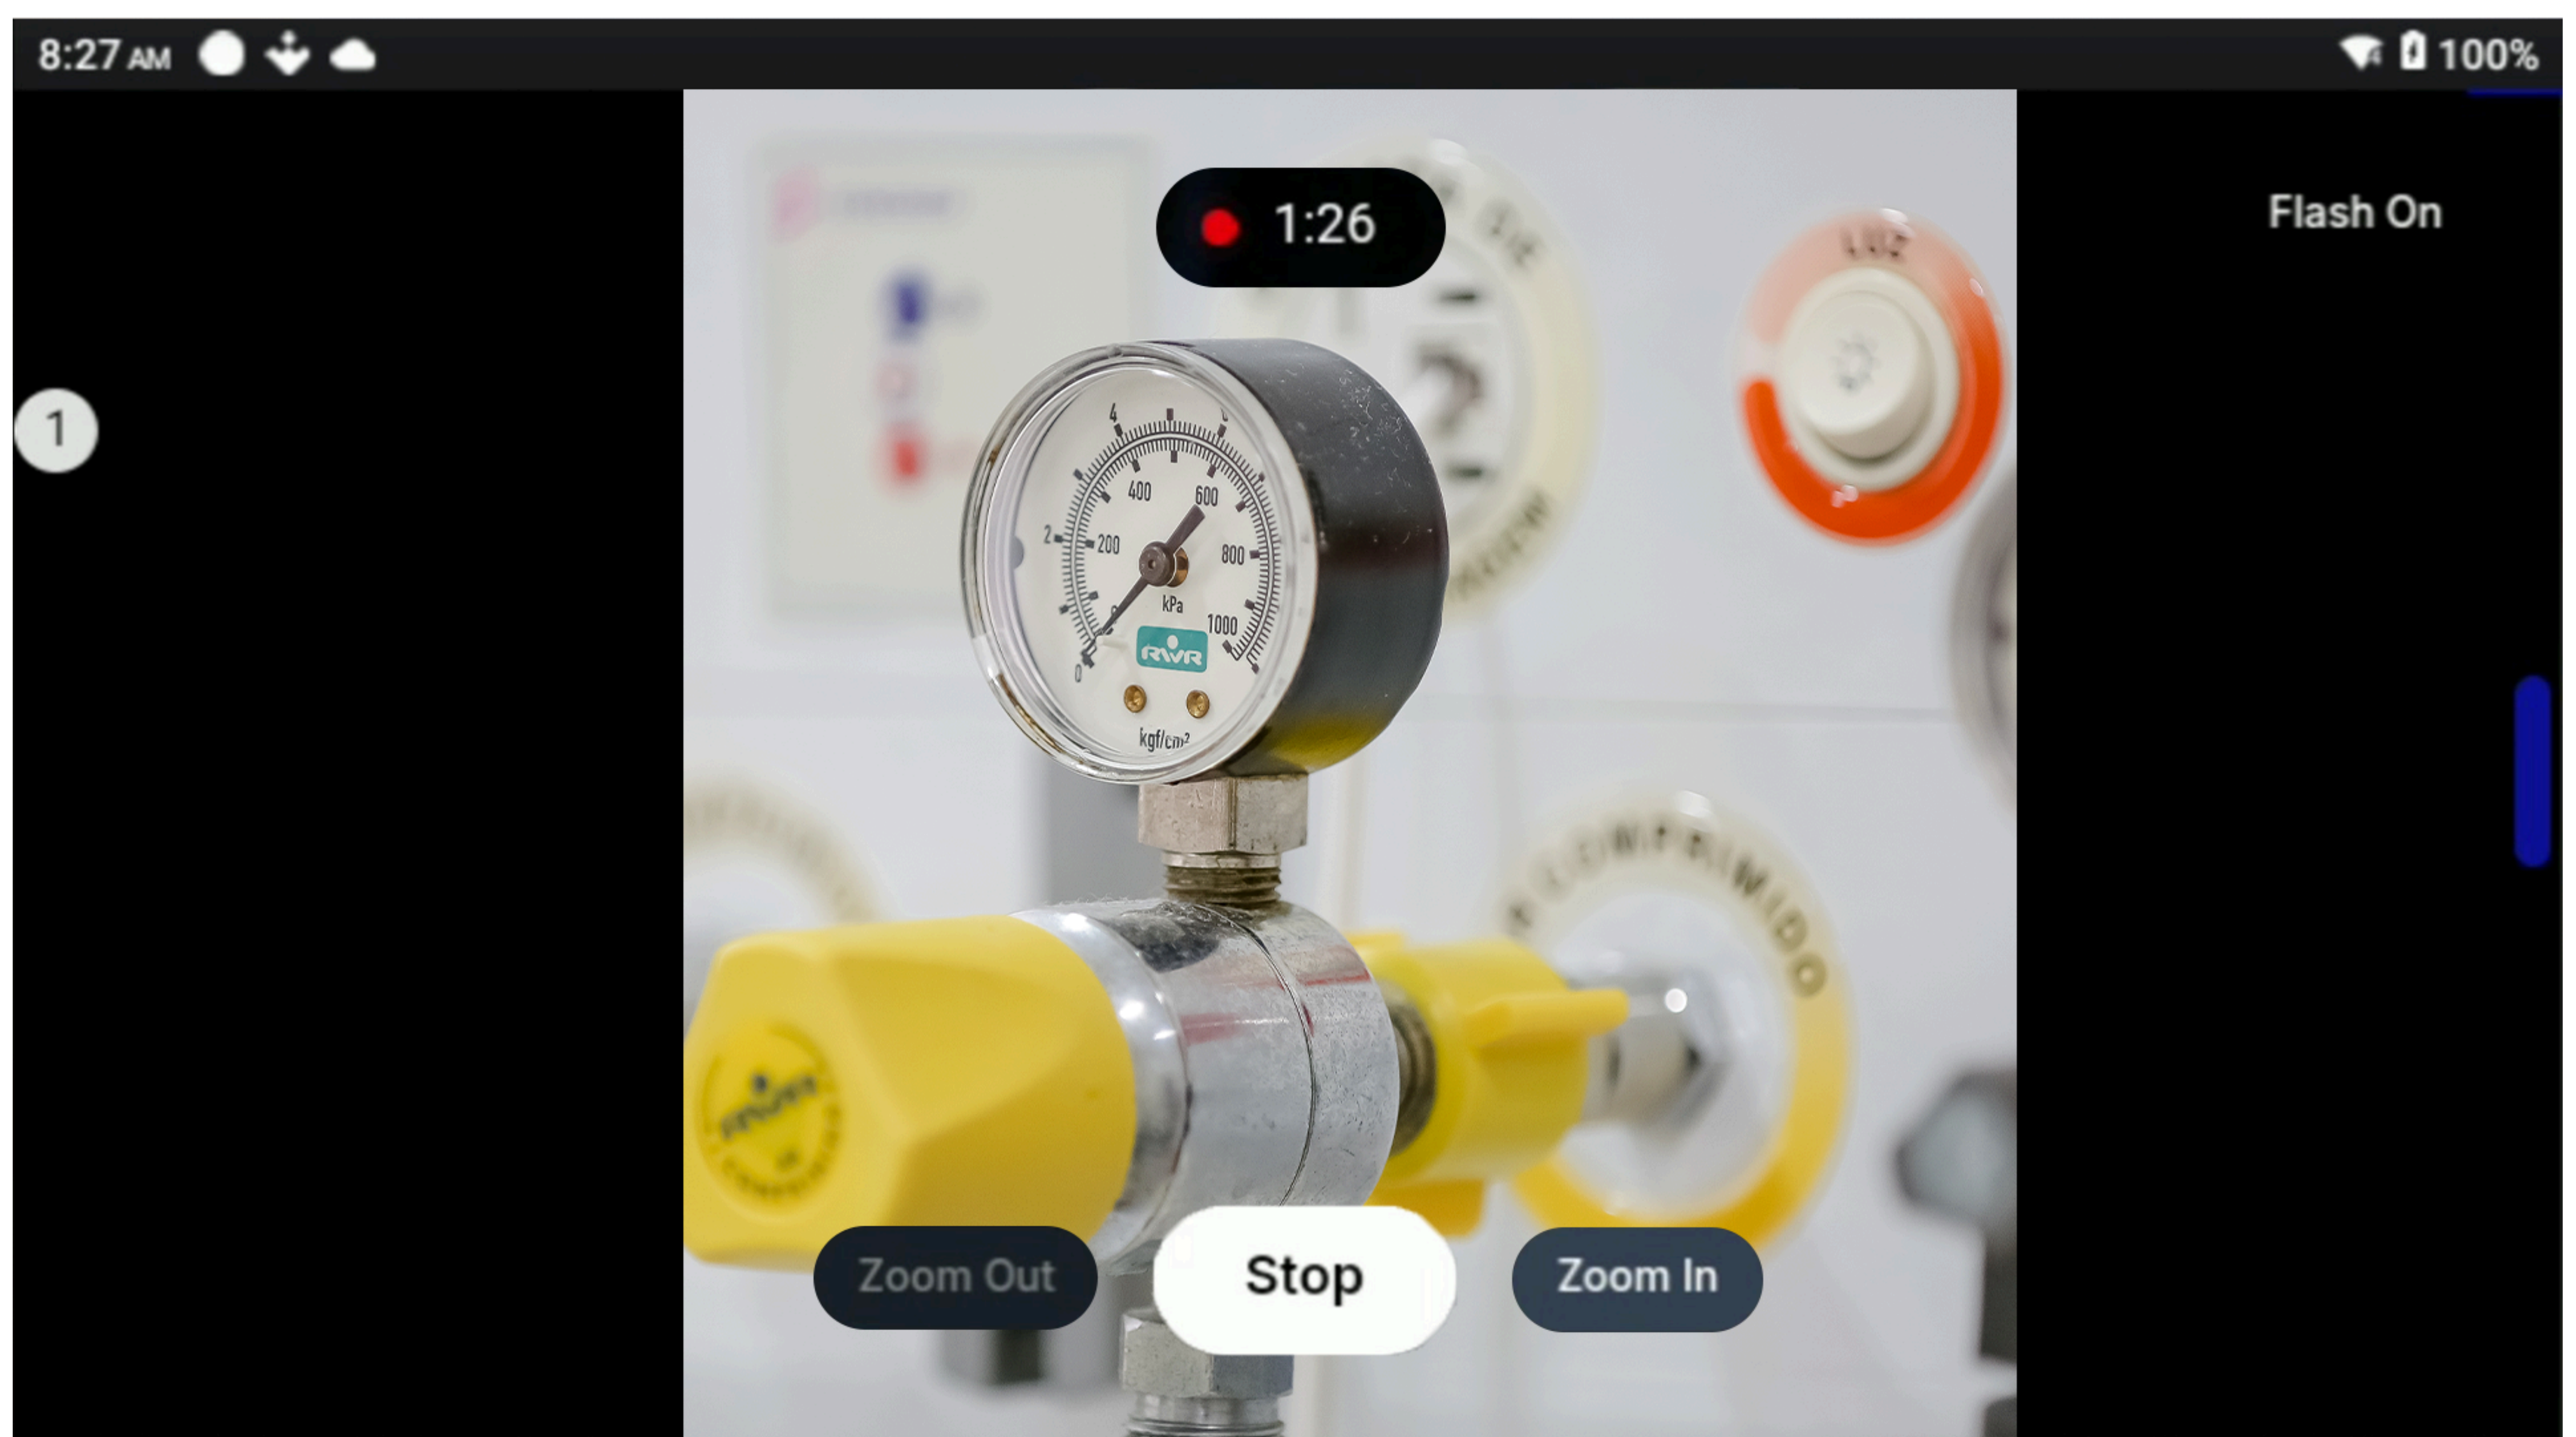

- Say "Record Video" to start recording a video.
- Say "Open 1", "Open 2", etc., to open a specific PDF.
- Say "Delete 1", "Delete 2", etc., to delete a specific report.
- Say "Delete All" to delete every report.

Recording and Capturing Video

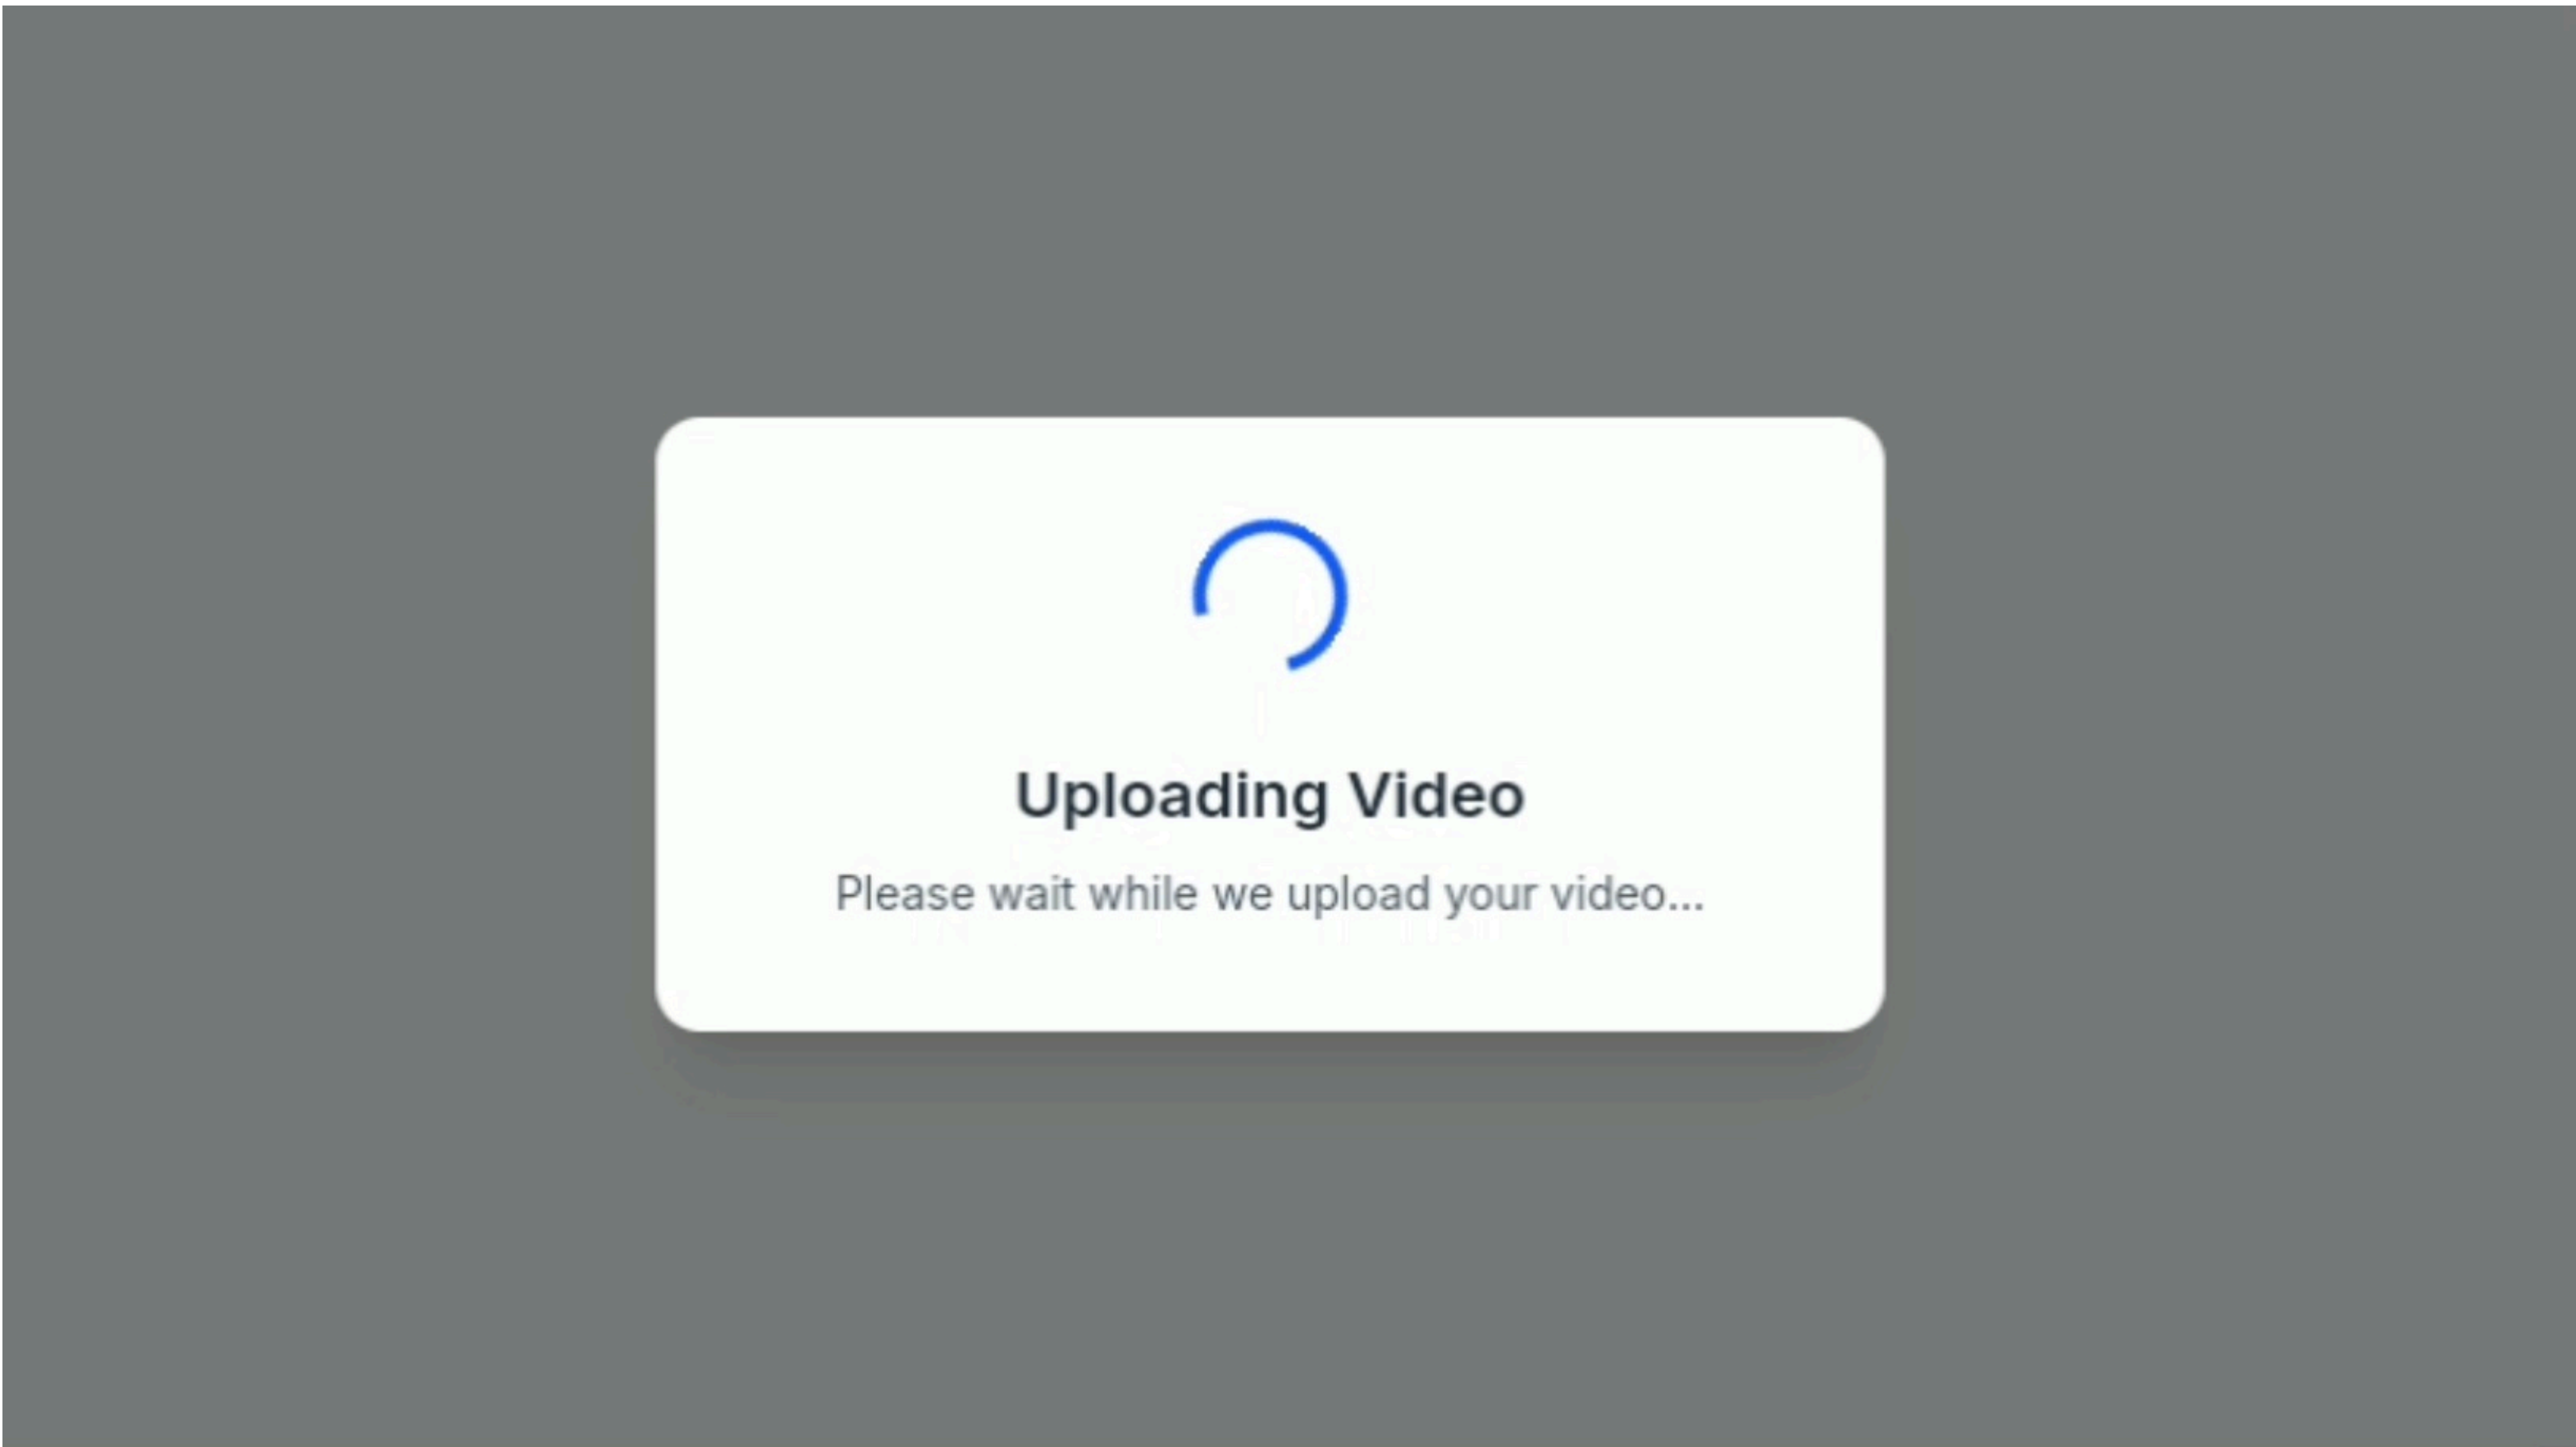

Start a recording to allow the AI to analyze your current environment or task.

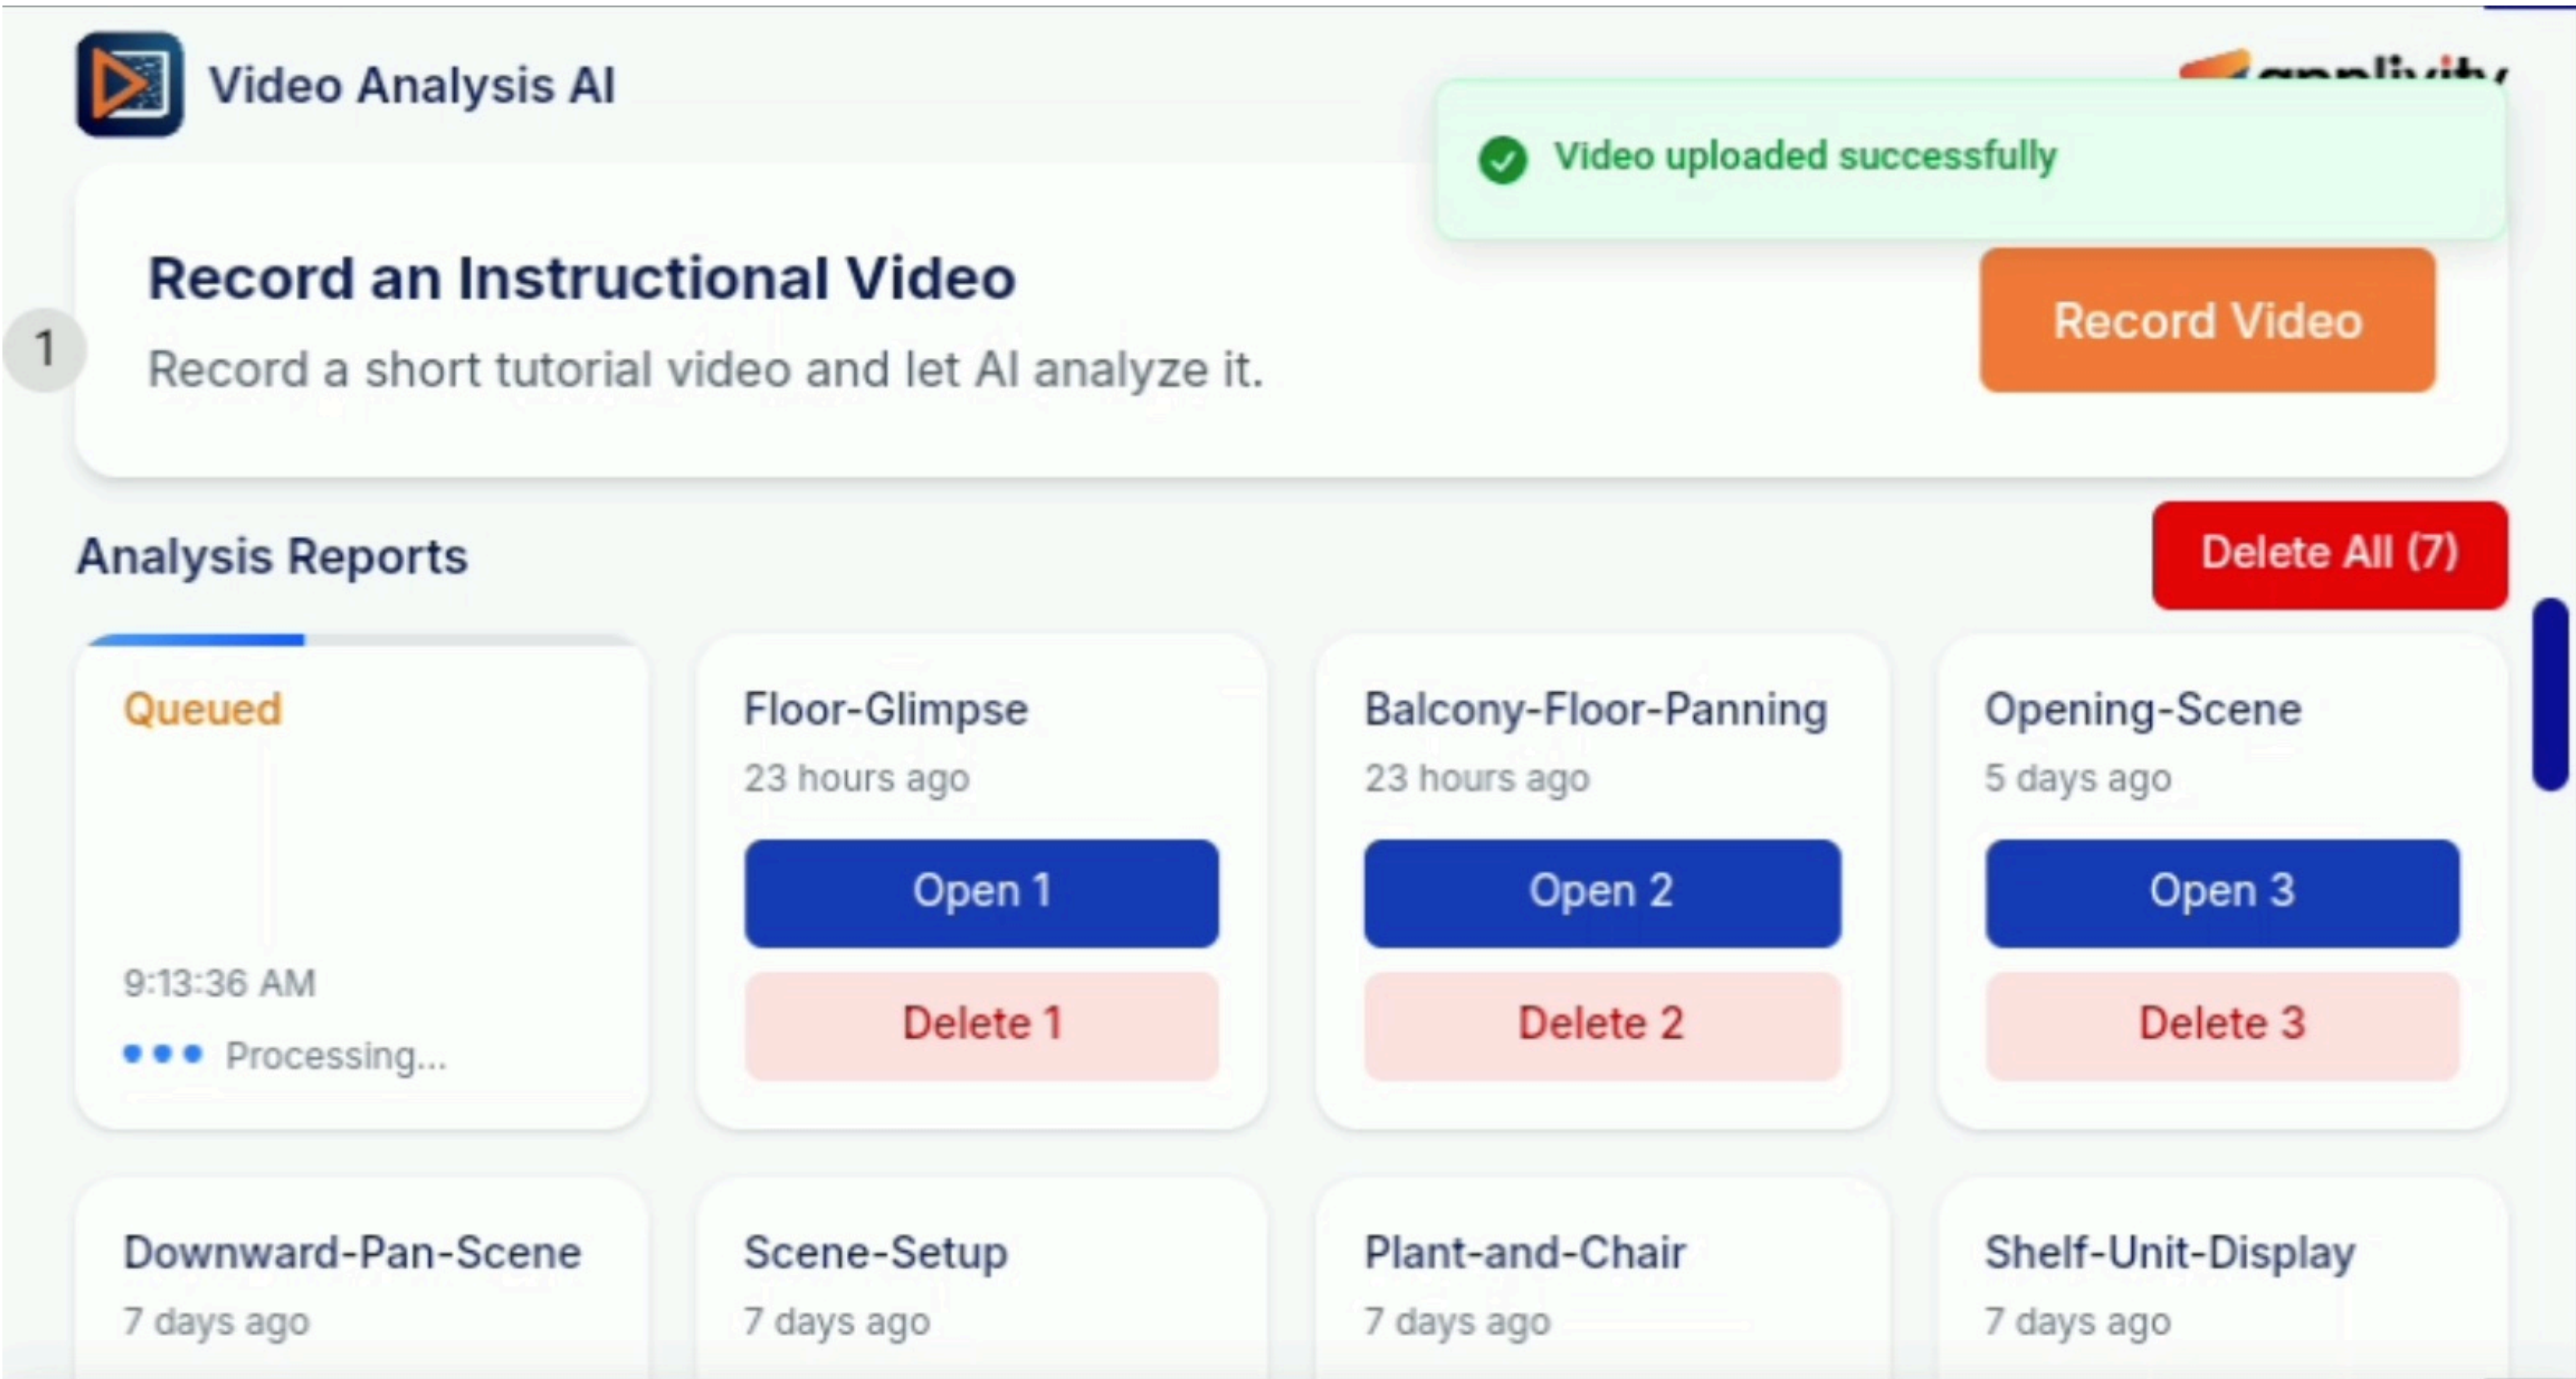

- Select the Record Video button on the dashboard to begin live capture.
- Ensure the camera is stable and focused on the subject of analysis.

Video Upload & Processing

- Once you stop the capture, the video begins to upload.
- When processing is complete, a PDF report is automatically sent to your registered email and synced to your device dashboard.

Reviewing PDF Reports

You can review detailed findings directly on your RealWear headset.
